STACKABLE

MICROWAVABLE

RIBBED PANELS FOR
ADDED STRENGTH

Bagasse pulp blend packaging is a leading alternative solution to traditional hinged containers. Made from renewable sugarcane fibers, each container is sustainable from the beginning stages of the product life cycle to the end. Bagasse containers are biodegradable and compostable.

Item Code	Description	Material Colour	Case Pack
HCE6631	6 x 6 x 3" Hinged Container	Bagasse Natural	500 / Case 10 Sleeves of 50 Pieces
HCE8831	8 x 8 x 3" Hinged Container	Bagasse Natural	200 / Case 4 Sleeves of 50 Pieces
HCE9931	9 x 9 x 3" Hinged Container	Bagasse Natural	200 / Case 4 Sleeves of 50 Pieces
HCE9631	9 x 6 x 3" Hinged Container	Bagasse Natural	200 / Case 4 Sleeves of 50 Pieces

Bagasse products go through a manufacturing process that starts by extracting sugarcane stalks of their juices to dehydrate the plant. The leftover stalk fibers, known as mulch are then processed by using high heat and pressure to form into durable and stylish food packaging. After using the products, they can be fully composted and turned into soil, making them truly sustainable.

Item Code	Description	Material Colour	Case Pack
 PLT-E6W	6" Plate	Bagasse Natural	1000 / Case 8 Sleeves of 125 Pieces

 BWL12EWR	12oz Bowl, Wide Rim	Bagasse Natural	1000 / Case Bulk Pack

WOODEN CUTLERY

Wooden cutlery is a natural alternative to single-use plastics. It is sustainable because it comes from fast-growing renewable trees. The two most popular types are Birch and Bamboo. Our wooden cutlery comes from forests that are planted for the sole purpose of harvesting, which allows old growth and other natural forests to remain intact, protecting biodiversity. Wooden cutlery is biodegradable and compostable.

Item Code	Description	Material Colour	Case Pack
BULK UNWRAPPED			
CUT1-WB	Fork Standard Birchwood, 6"	Wood Natural	1000
CUT2-WB	Knife Standard Birchwood, 6.5"	Wood Natural	1000
