Hot Cups, Lids & Stirrers

.....

In today's fast-paced world, quality single-use products are no longer a convenience – they're a necessity. Whether it's hot tea, cocoa or gourmet coffee, you need cups, lids and stirrers that will deliver value and performance. At Solo®, we're here to provide a solution.

We offer superior value across an extensive line of quality hot beverage products, and we want to make sure you get exactly what you need. Use this section as a comprehensive guide to making the right choices in single-use cups, lids and stirrers.

HOT CUPS

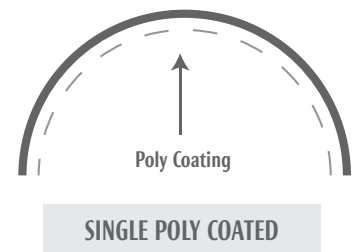

We're proud to be known for our famous red cup, but there's more to our story. We have a wide array of quality single-use cups designed especially for foodservice. When choosing a hot cup, it is important to think about material and appearance.

MATERIAL

Solo hot cups are available in various paper and foam materials, each suited to different occasions, beverages and price points. All Solo cups are well engineered with strong sidewalls and smooth, rolled rims for comfort, safety and optimal lid fit.

PAPER

We coat the interior of our paper cups with a single poly (polyethylene plastic) film to make them optimal for hot beverage applications. With a matte finish on the exterior, the paper's superior printability allows you to offer a matched design across all serviceware (cups, plates, bowls and food containers).

COMMERCIALLY COMPOSTABLE MATERIALS

For some food packaging applications, a commercially compostable product is the most environmentally responsible option. Our SSPLA coated hot cups are fully compostable in a commercial compost facility, where it is designed to quickly disintegrate and fully biodegrade.

SSPLA HOT CUPS

- Made from plant-based renewable resources
- Compostable in a commercial compost facility. Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting
- Approved by the Biodegradable Products Institute (BPI)
- Plant-based lining made with Ingeo™ biopolymer

RECYCLED MATERIALS

Reuse of resources is a key foundation of Solo's comprehensive environmental management. For our recycled content products, we use a percentage of paper material which has completed its life cycle as a consumer item and would otherwise end up in a landfill. We are able to utilize these post-consumer materials and still meet Solo's and your high standards of product quality, reliability and dependability.

PCF HOT CUPS

- First ever FDA-compliant PCF paper hot cup
- Made with at least 10% post-consumer recycled fiber
- Made from plant-based renewable resources
- Made with a poly lining which acts as a moisture barrier to keep liquid inside the cup

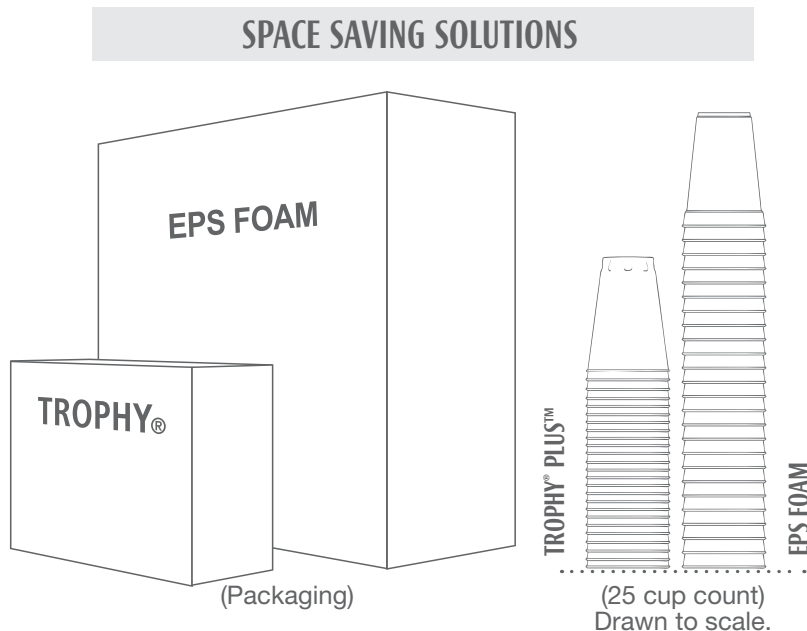

INSULATED PAPER

A dual layer paper cup with air pocket insulation for perfect hand-hold temperature. Eliminates the need for sleeves and double-cupping.

INSULATED FOAM

An expanded polystyrene material offers a single-cup solution for hot and cold beverages, perfect for operations looking for an economical insulated offering. Additionally, these cups feature a common lid fit for five cup sizes and a smaller case cube to minimize warehouse storage space, as well as top-to-bottom print capability to showcase your brand identity.

BENEFITS OF TROPHY® PLUS™ DUAL TEMPERATURE INSULATED CUPS

COLOR / DESIGN

Choose a look that will enhance your operation. Solo offers many attractive options. For custom printing, send us pre-existing graphics or utilize our design services.

Paper – Our paper cups are available in stock designs and can be custom printed in up to four colors (additional colors require special approval).

Trophy® Plus™ – Our insulated cups come in stock designs or can be custom printed in up to six colors.

LIDS

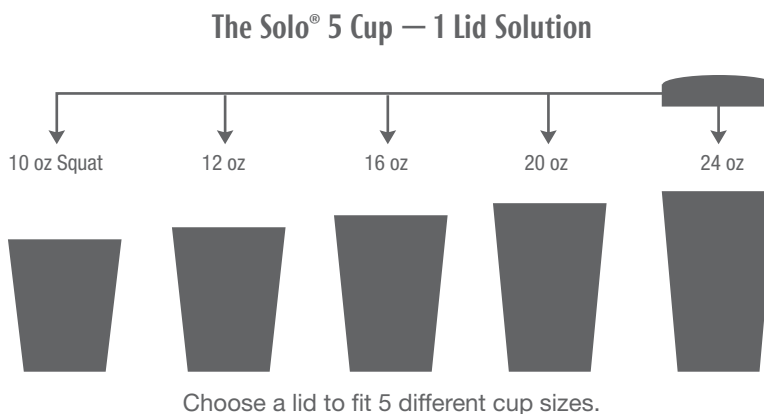

We have a lid for every application. Material, size and function are all important considerations.

MATERIAL

Whatever style of polystyrene lid you choose, our state-of-the-art engineering provides top-notch lid fit. You'll find our lids lightweight and flexible, and available in translucent, white, black or colored.

SIZE

Most lids fit a variety of cup sizes.

Whether you choose the famous Traveler® Lid, just one lid fits five of our most popular single sided poly cup sizes. With Solo®, smart operators reduce inventory and save money.

FUNCTIONALITY

Hot drink lids are made from polystyrene and are vented to allow the release of steam.

Traveler® and The Gourmet Lid® – These lids have a raised dome for froth or toppings and a user-friendly opening.

Liftback & Lock Tab Lid – Featuring a scored tab that you push back and lock into place.

Vented Lids – Solo's standard vented lids help keep beverages where they belong during transport.

SOLO'S POPULAR TRAVELER® LID

DOME LID:

Allows extra space for froth and has an upscale appearance

PARTIAL PLUG FIT:

Inner ring reduces pop-off incidents, providing a more secure lid fit and reducing dribble at the rim and cup seam

1 LID FITS 5 CUP SIZES:

10 oz squat - 24 oz cups have common lid fit to reduce number of lid SKUs operators need to stock

STIRRERS

We've developed a complete line of top-quality polypropylene stirrers to cater to all of your hot tea, coffee, steamer and other beverage needs. Count on them to be both strong and flexible. You'll want to consider length, color and style.

LENGTH

Lengths vary from 5.5 – 7 in.

COLOR

Solo® offers a decorative range from solid to striped.

STYLE

Flat or round, whatever feels right for you.

NOTE: Reference product pages/charts for appropriate cup and lid combinations.

Single Sided Poly Paper Hot Cups & Lids

Solo® single sided poly hot cups are great for serving hot beverages like coffee, tea or cocoa. The cups are lined with polyethylene which acts as a moisture barrier to keep liquid inside the cup and prevent leaking. Solo single sided poly hot cups feature a smooth rolled rim that gives rigidity to the cup and ensures a leak-resistant lid fit and are available in a variety of stock or custom prints to complement any operation.

Bare® Eco-Forward® Single Sided PLA (SSPLA) Hot Cups & Lids

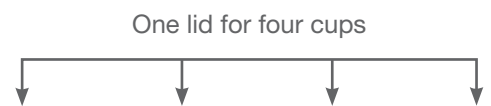

For some food packaging applications, a compostable product is the most environmentally responsible option. Our PLA-lined hot cup is fully compostable in a commercial compost facility, where it is designed to quickly disintegrate and fully biodegrade.

- Made from 100% plant-based renewable resources and made with either FSC or SFI certified paperboard
- Compostable in a commercial compost facility. Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting
- Meets the ASTM D6868 standard and certified by the Biodegradable Products Institute (BPI) as compostable in a commercial composting facility. Cedar Grove, Inc. facilities accepted

Bare® Eco-Forward® Recycled Content (PCF) Hot Cups & Lids

Reuse of resources is a key foundation of Solo's comprehensive environmental management. For our recycled content hot cups we use paper material which has completed its life cycle as a consumer item and would otherwise end up in a landfill. We are able to utilize the post-consumer materials and still meets Solo's and your high standards of product quality.

Bare®

- First ever FDA compliant PCF paper hot cup
- Made with at least 10% post-consumer recycled fiber
- Made from plant-based renewable resources
- Made with a poly lining which acts as a moisture barrier to keep liquid inside the cup

Material	Cup: Paper with 10% PCF Lid: Polystyrene
Cup Sizes	4 - 20 oz (118 - 591 ml)
Cup Color/Design Options	Bare® (Special Prints also available)
Lid Options	Traveler® - Black/Brown/White, Liftback and Lock Tab - White, Vented - White
SPI Resin Identification Code	Lid: 6 PS

One lid for four cups

Duo Shield® Insulated Hot Cups & Lids

Duo Shield® insulated paper hot cups provide air pocket insulation to keep beverages hot and hands at a comfortable temperature. This dual layer product, made with 95% plant-based renewable resources with a poly lining that acts as a moisture barrier to keep liquid inside the cup, eliminates the need to add a sleeve or double cup hot beverages. The ideal solution for specialty coffee, lodging, travel and leisure operations.

Trophy® Plus™ Dual Temperature Insulated Cups & Lids

Trophy® Plus™ dual temperature insulated cups – now with improved rigidity – offer a single-cup solution for hot and cold beverages, a common lid fit for the five most popular cup sizes, and a smaller case cube to minimize storage space and make shipping more efficient. Top-to-bottom print capability gives operators maximum space to showcase their brand and special messaging. Plus, the glossy finish and paper-like printing quality enhances the offering, making Trophy® Plus™ an optimal solution for every beverage need.

Cold Cups, Lids & Straws

In today's fast-paced world, quality single-use products are no longer a convenience – they're a necessity. Whether it's iced coffee, colorful frozen beverages or giant sodas, you need cups, lids and straws that will deliver value and performance. At Solo®, we're here to provide a solution.

We offer superior value across an extensive line of quality cold beverage products, and we want to make sure you get exactly what you need. Use this section as a comprehensive guide to making the right choices in single-use cups, lids and straws.

COLD CUPS

We're proud to be known for our famous red cup, but there's more to our story. We have a wide array of quality single-use cups designed especially for foodservice. When choosing a cold cup, think about material, size and appearance.

MATERIAL

Solo cold cups are available in various plastic, paper and foam materials, each suited to different occasions, beverages and price points. All Solo cups are well engineered with strong sidewalls and smooth, rolled rims for comfort, safety and optimal lid fit.

PLASTIC

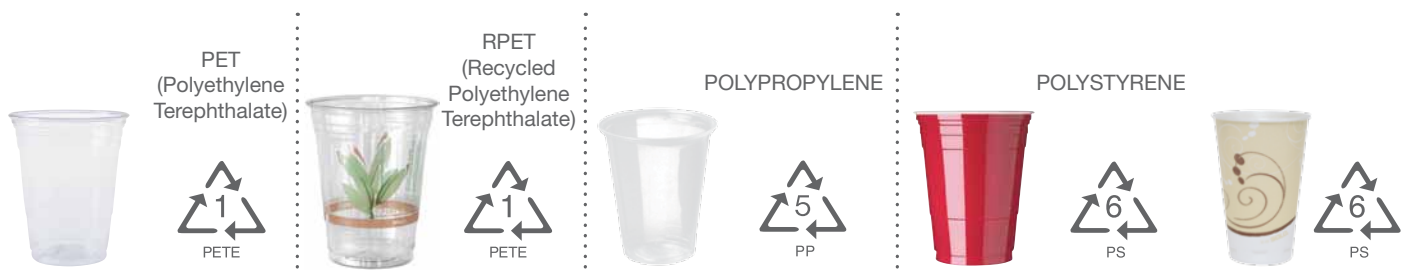

Delivering the ultimate in functionality, plastic cups are durable, don't absorb liquid and resist cracking.

PET (Polyethylene Terephthalate) – PET has the highest level of clarity and is completely odorless. It's shatter resistant, safe and an elegant alternative to glass.

RPET (Recycled Polyethylene Terephthalate) – Clear, plastic cold cups that contain 20% post-consumer recycled PET material which is recycled material.

Polypropylene – A lightweight, durable material that is crack and shatter resistant. All sizes available in clear with the 20, 32 and 44 oz sizes also available in white.

Polystyrene – A sturdy, rigid material, polystyrene can be translucent, colored or clear.

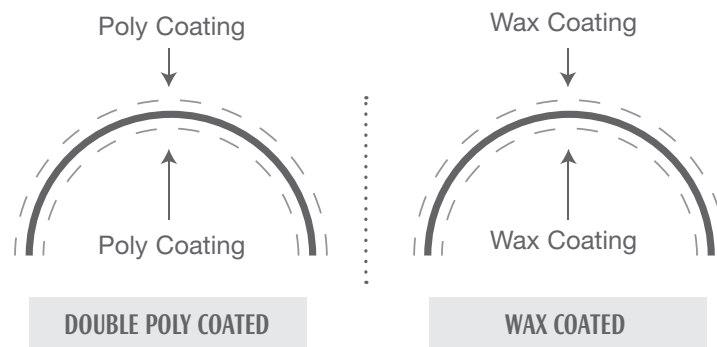

PAPER

Paper's superior printability allows you to offer a matched design across all serviceware (cups, plates, bowls and food containers).

Double Poly Coated Paper – The preferred paper cup for cold beverages because both the interior and exterior are coated with a polyethylene plastic film. This not only keeps liquids in, but also protects the outside of the cup from weakening due to sweating. Double Poly cups have a glossy finish.

Treated Paper Cups – Also great for cold beverages, wax coated paper offers similar benefits to the double poly cup. In addition, our wax products are a great Eco-Forward® option, meeting the ASTM D6868 standard for compostability. Compostable in a commercial compost facility. Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting.

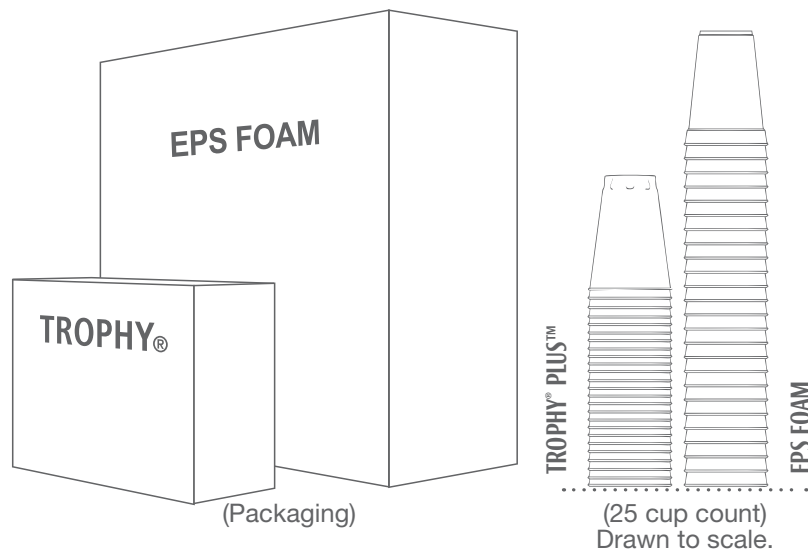

INSULATED FOAM

An expanded polystyrene material offers a single-cup solution for hot and cold beverages, perfect for operations looking for an economical insulated offering. Additionally, these cups feature a common lid fit for five cup sizes and a smaller case cube to minimize warehouse storage space, as well as top-to-bottom print capability to showcase your brand identity.

BENEFITS OF TROPHY® PLUS™ DUAL TEMPERATURE INSULATED CUPS

SPACE SAVING SOLUTIONS

COLOR/DESIGN

Choose a look that will enhance your operation. Solo offers many attractive options.

Plastic – Our plastic cups come in clear, translucent, solid colors, stock designs or custom printed.

Paper – Our paper cups are available in stock designs and can be custom printed.

Foam – Our foam cups are available in stock designs and can be custom printed.

Prints – In most cases, we can custom print in up to four colors (additional colors require special approval). For custom printing, send us pre-existing graphics or utilize our design services.

LIDS

We have a lid for every application. Material, size and function are all important considerations.

MATERIAL

Cold cup lids are made from one of two plastics, each with their own special attributes. Whatever lid you choose, our state-of-the-art engineering provides top-notch lid fit.

PET (Polyethylene Terephthalate) – Provides premium clarity, strength and stress-crack resistance.

Polystyrene – Lightweight, flexible, and available translucent, clear or colored.

SIZE

Lids may fit a variety of cup sizes or only one cup size.

FUNCTIONALITY

Choose translucent, clear or colored lids to top off your cold beverages in style.

Straw Slot Lids – Have a pre-cut slot to accommodate straws.

Identification Straw Slot Lids – In addition to having a pre-cut slot, they also have pushdown identification buttons.

No Slot Lids – These have no pre-cut slot, so they're more suitable for transporting.

Dome Lids with Hole – PET plastic gives these lids excellent clarity and provides an enticing view of the cup's contents. Use them for crushed ice drinks, fruit and parfaits (any time where the product may go over the rim).

Dome Lids with Wide Hole – For use with long soda spoons in thicker shakes (with fruit chunks, etc.).

Dome Lids No Hole – These lids are great for on-the-go meal applications.

STRAWS

Solo® has developed a complete line of straws to cater to all of your soda, iced coffee, smoothie and other beverage needs. We use only top-quality polypropylene for flexibility and strength. You'll want to consider diameter, length, color, packaging and style.

INNER STRAW DIAMETER

When selecting the straw diameter, keep your application in mind. We offer a variety of different sizes.

NOTE: All straw diameter measurements listed above are for the inside diameter of the straw.

LENGTH

Straw lengths vary from 5" to 10.25" in our stock size and up to 12" as a special order item.

You can be sure we have a length that matches your cup height perfectly.

COLOR

Choose from a decorative range of clear, solid or striped.

PACKAGING

Choose from bagged, bulk, wrapped or unwrapped styles.

STYLE

Solo gives you all the options you need.

Milk – Smaller for milk and juice cartons.

Soda – For any cold beverage.

Flexible – Featuring a bendable neck for easy drinking.

Scoop – With a spoon-shaped end for frozen drinks.

Colossal – For extra-thick shakes, smoothies or bubble tea.

NOTE: Reference product pages/charts for appropriate cup and lid combinations.

Solo® Ultra Clear™ PET Cups & Lids

Showcase colorful or signature beverages with the best of the best. Solo® Ultra Clear™ Cups have superb clarity and crack resistance for a high-end look and feel. Easily recyclable where available, they also feature excellent taste and odor integrity. When you need to impress, the difference is clear.

Bare® Eco-Forward® Recycled Content (RPET) Cups & Lids

Reuse of materials is a key foundation of our company's comprehensive environmental management. For our recycled content cold cups we use plastic material which has completed its life cycle as a consumer item and would otherwise end up in a landfill. We are able to utilize the post-consumer materials and still meet your high standards for product quality.

- PET Cup made with at least 20% post-consumer recycled material
- FDA compliant material

Kids' Cups

Fun is the name of the game with our colorful Kids' Cups. They come combo packed with red lids, flexible straws, and printed with either of two playful stock designs or with your own custom design. Best of all, they're a smart alternative to our competitors' pricey injection molded cups.

BRINGING ALTERNATIVE RESOURCES

S

.....

Sanitation Wrapped Cups

.....

Sanitation for any type of lodging operation. Our wrapped drinking cups help alleviate your guests' concerns about hygiene. Single-use solutions help save you time, water, and energy costs associated with cleaning traditional glassware. They also reduce theft and breakage of glasses, while offering low replacement cost.

SANITATION CUPS

Our full line of wrapped paper, plastic and foam cups present a variety of features and benefits to accommodate your guests and your operation.

MATERIAL

Solo® wrapped cups are available in paper, plastic and foam materials. Our variety of durable, high-quality options provides the right cup for your specific needs in the right styles to match your décor.

INSULATED FOAM

An expanded polystyrene material offers a single-cup solution for hot and cold beverages, perfect for operations looking for an economical insulated offering. Additionally, these cups feature a common lid fit for five cup sizes and a smaller case cube to minimize warehouse storage space, as well as top-to-bottom print capability to showcase your brand identity.

PLASTIC

Wrapped PET – PET has the highest level of clarity and is completely odorless. It's a shatter resistant, safe and elegant alternative to glass.

Wrapped Polystyrene – A sturdy, rigid material, polystyrene can be translucent, colored or clear.

PAPER

Wrapped SSP – We coat the interior of our paper cups with a single poly coating (polyethylene plastic) film to make them optimal for hot beverage applications. A matte finish on the cup exterior allows for superior printability.

RECYCLED MATERIALS

Our high-quality recycled content products are made with paper and plastic material that has completed its life cycle as a consumer item and would otherwise end up in a landfill.

Wrapped RPET Cups

- PET cup made with at least 20% post-consumer recycled material
- FDA compliant material
- Custom or co-logo prints available

Wrapped PCF Cups

- First ever FDA-compliant PCF paper hot cup
- Made with at least 10% post-consumer recycled fiber
- Made from plant-based renewable resources
- Custom or co-logo prints available

Single Sided Poly Paper Wrapped Cups

Our sanitation wrapped cups not only reassure your guests that you are dedicated to sanitation, they also help you improve efficiency and reduce costs.

Specialty & Water Cups

.....

SPECIALTY & WATER CUPS

Different operations have different needs, so there's no one-size-fits-all when it comes to single-use cups. With this in mind, Solo® has developed an extensive and varied line of superior water and specialty cups. Rest assured you'll find a style that fits the bill and quality you can count on.

PLASTIC & PAPER MEDICAL & DENTAL CUPS & LIDS

We offer a full line of top-notch plastic and paper cups for medical testing, inpatient room care, dispensing medications and serving outpatients.

PLASTIC SAMPLING CUPS & LIDS

These small cups are ideal for samples and taste testing. They're available in a range of colors, with the option of adding a lid.

COZY® CUP HOLDER & INSERT

Cozy® Cups never seem to go out of style – and why should they? They make a convenient and inexpensive alternative to ceramic mugs.

BARE® TREATED PAPER WATER CUPS

Another reliable option. Made with treated paper, these cups provide excellent value, as well as meeting the ASTM D6868 standard for commercial compostability. Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting.

BARE® TREATED PAPER FUNNEL CUPS & CONE JACKETS

We offer paper cone products to fit a variety of needs. Consider funnel cups for industrial uses, like pouring oil, or cone jackets with double wrapped tips for treats like ice cream.

VENDING CUPS

Our complete lines of attractive cups with exciting stock graphics make your vending selection stand out. With paper, plastic and insulated foam hot and cold drink cups, there's a solution for whatever you're selling in your machines.

Plastic Medical & Dental Cups

We offer a full line of top-notch plastic cups for medical testing, inpatient room care, dispensing medications and serving outpatients.

Dinnerware

The right dinnerware can make all the difference. After all, it's an integral part of every meal you serve. From garlic mashed potatoes to a roast chicken quarter to a decadent hot fudge sundae, the single-use products that carry your culinary creations are a direct reflection on your operation.

At Solo®, we're here to see that your dinnerware is making the right impression. We'll help you choose from our extensive line of top-quality plates, bowls and corresponding lids. No matter what you're serving, you'll find exactly what your unique operation requires.

DINNERWARE

.....

Before you select a specific product line, you'll want to weigh four primary variables: material, shape/size, design and usage.

MATERIAL

Single-use plates and bowls are made from a variety of plastic, paper, sugarcane and foam materials. Your choice will depend on application and operation.

PLASTIC

A popular choice with operators, we use polystyrene exclusively in our plastic dinnerware. Count on every piece being rigid, sturdy, versatile and extremely durable. Plastic dinnerware can be used for both hot and cold foods, is available in several different weights, sizes and comes in a bountiful array of colors.

PAPER

Paper offers its own numerous choices. At Solo, we give you the option of a range of different clay coated paper weights to suit your performance needs. Our clay coating provides additional moisture resistance and a superior print quality.

Commercially Compostable Paper – For some food packaging applications, a compostable product is the most environmentally responsible option. Our compostable paper plates degrade in a commercial compost facility through the controlled biological decomposition of organic material in the presence of water, heat and bacteria to form a humus-like material and are approved by the Biodegradable Products Institute (BPI). Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting.

Heavy Weight – Perfect for serving heavier food items; the thicker, stronger paperboard provides superior rigidity and strength. The clay coating and special over varnish gives a semi-glossy appearance, outstanding cut resistance and a superb barrier against grease and other moisture.

Medium Weight – For moderate durability that stands up to heavier entrees, medium weight paper dinnerware offers a good combination of rigidity and everyday strength. This weight also features good well depth, is clay coated for moisture resistance and has a semi-glossy exterior.

Light Weight – The most economical choice, light weight paper dinnerware is designed for lighter dishes that require little cutting. Our light weight paper dinnerware is clay coated, offering basic grease resistance, and is better suited to sandwiches and dry snacks.

SUGARCANE

- Designed as a stylish alternative to traditional round dinnerware, these sturdy Bare® plates are perfect for both the environmentally and style conscious.
- These square Bare® plates are made with bagasse, a natural bi-product of sugarcane processing which is not only made from plant-based renewable resources, but is also compostable at commercial compost facilities. Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting.
- Our sugarcane dinnerware has excellent rigidity and soak-through resistance which will stand up to the rigor of heavy or saucy foods.
- Approved by the Biodegradable Products Institute (BPI).

FOAM

Foam offers the operator a wide range of shapes and sizes and works well for both hot and cold foods. Though you will find various levels of durability and performance within the foam category, foam dinnerware resists bending and cracking, deters leaks and spills and doesn't absorb liquids.

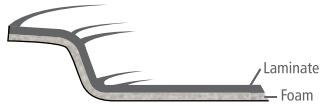

Heavy Laminated – Higher-end foam plates and bowls have a heavy layer of poly laminate fused to the foam for added strength and durability. This laminate delivers an excellent cut resistant surface and is a fine alternative to permanentware when serving denser foods like steak.

Laminated – A standard, single layer of laminate provides foam dinnerware with reliable cut resistance and strength. A good choice for heavier or hot entrees.

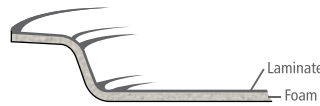

Unlaminated – Unlaminated foam dinnerware is popular with price-conscious buyers. Our unlaminated options are light weight yet offer security. They're best used for items that don't require cutting, like sandwiches.

Small Round Plate

Platter

COLOR/DESIGN

Finding the appropriate look is essential. Whatever your preference, we have you covered.

Plastic – Choose black, red, white or clear plastic to match your décor or tablesetting.

Paper – Most paper plates and bowls can be custom printed in up to four colors. Our stock designs include white, Bare® and Symphony®.

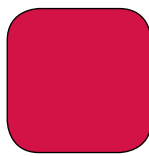

Foam – Foam is offered in black, champagne and white.

USAGE

Think about how you will be using your plates and bowls. When and where you use your dinnerware will also affect your product choice.

On-Premise – Your patrons will appreciate single-use dinnerware that provides cut resistance and delivers a worry-free experience. It's also important to make selections that will complement your decor.

Prepackaging – For prepackaged foods it's all about presentation. Look for plates, bowls and lids that enhance the visibility of your offerings. Also, make sure to choose dinnerware that will hold up over time and not absorb moisture. Try heavy weight foam or plastic for best results. Also choose our flat top lids for easy stacking.

Pack-to-Order – Select plates and bowls that will withstand the rigors of pickup and delivery. Foam and plastic make excellent choices – and don't forget the lids.

LIDS

Lids are often a necessity for plated meals on the move. To make things easier, we offer several styles of clear plastic dome lids for our platters, plates and bowls. These top-quality lids are made from OPS (oriented polystyrene), a crystal styrene that's stretched during the extrusion process to add strength while maintaining clarity. They feature a convenient finger well that allows your customers to remove them with ease.

Dome Lid for Platters

Solo Squared™ Plastic Dinnerware

For a serving option with a flair for the dramatic on the table or display, Solo Squared™ offers a sleek, versatile line of black, Squared®-shaped plastic dinnerware that performs as beautifully as it looks. Its distinctive geometry and sturdy construction enhance meal presentation and ensure greater comfort and security. A snap-tight lid extends the product value from dine-in to takeout helping to reduce spills and eliminate bulky takeout packaging.

Food Containers & Lids

.....

As today's consumer relies more and more on the foodservice industry, quality single-use products have become essential for both takeout and on-premise purposes. To that end, Solo® offers a broad line of food containers, soufflé portion cups and lids that deliver exactly what your business demands. Whether you're serving soup, salad dressing, ice cream or a hot meal to go, use this as a guide to selecting the containers that are right for you.

FOOD CONTAINERS

Different food containers are tailored to different applications. To decide which of our products will suit you best, consider material, size, design and usage.

MATERIALS

Food containers can be made from a variety of plastic and paper materials. Your choice depends on both application and operation.

PLASTIC

If it's a versatile and resilient choice you're after, plastic may be what you're looking for. Quality plastic resists breakage, is odorless, can provide excellent clarity and guards against leaks and spills.

Polyethylene Terephthalate (PET) – With the highest level of clarity, PET showcases food items and is an elegant, shatter-resistant alternative to permanentware. PET provides an oxygen barrier that maintains the freshness of pre-packaged takeout offerings and, because it is resistant to fats and oils, PET is the perfect choice for salad dressings.

Polypropylene – Polypropylene is versatile, durable and available in black, white or translucent for contact clarity. It's great for hot or cold foods, and can be used for reheating food in the microwave.

Polystyrene – A sturdy, rigid material, polystyrene can be translucent or colored. Polystyrene containers can handle a wide variety of temperature ranges, so they're a good choice for both hot and cold menu items.

PAPER

Paper food containers are great for takeout and soufflé portion cups are often used at condiment stations. Many foodservice professionals find both to be valuable back-of-house tools.

Heavy Duty Double Poly – Coated on the inside to serve as a moisture barrier and on the outside to prevent weakening due to sweating, heavy duty double poly containers are ideal from frozen to hot foods. The glossy exterior coating also ensures excellent print quality.

Single Poly – With a moisture-resistant interior coating, single poly containers work well from frozen to hot foods. Their uncoated exteriors have a natural appearance.

PLA – A versatile container that keeps hot and cold food fresh. Made from plant-based renewable resources, PLA is fully compostable in a commercial compost facility. Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting.

Waxed – Waxed containers are best for cold foods and are coated on both sides to provide a moisture barrier.

Untreated – Double-wrapped untreated buckets are sturdy, leak-proof and ideal for room temperature foods. Untreated soufflé portion cups can be used in various on-premise applications.

Grease Resistant – To provide a barrier to the fat in hot food items, these containers are made from special grease-resistant paper.

Sugarcane – Our Bare® sugarcane to-go containers have excellent rigidity and soak-through resistance which will stand up to the rigor of heavy or saucy foods. Sugarcane food containers are made with bagasse, a natural by-product of sugarcane processing which is not only made with annually renewable sugarcane, but it is also compostable at commercial compost facilities. Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting.

SIZE

Solo® offers an extensive range of food container sizes – from 0.5 oz soufflé portion cups to 170 oz buckets – so you're sure to find a solution to fit every one of your needs.

COLOR/DESIGN

Presentation means a lot in this business, so we provide the choices you need to get just the right look. We offer plastic containers in clear, translucent, white or black. You'll find our paper containers available in white or your choice of popular stock designs. With select containers, you also have the option of custom printing in up to six colors or process printing.

USAGE

How you intend to use your containers is obviously an important consideration.

Prepackaging & Takeout

If you offer prepackaged items like salads for grab-and-go customers, be sure to choose containers and lids that highlight contents and perform well on the shelf. All paper and plastic takeout packages – including buckets, hinged and separate plastic bases and lids – need to be sturdy enough to withstand the rigors of takeout and delivery.

On-Premise Dining

We offer a container tailored to just about every on-premise dining occasion. Paper soufflé portion cups are great for use at condiment bars. For salad dressings and sides, their plastic counterparts provide all the resiliency you need.

Back-Of-House

Disposable containers can be valuable back-of-house tools. Soufflé portion cups and food containers help foodservice professionals measure, prepare and store with ease.

SOMETHING FOR EVERYTHING

Paper or plastic, we offer a container tailored to just about every need.
Here are a few highlights from our broad line.

Chicken Bucket

LIDS

Lids are critical to the performance of food containers – especially in takeout operations. Look for secure lid fit, and think about the right material, style and size for your application.

MATERIALS

First, decide which material is needed. It's important to note that the clearer the lid material, the fresher the food will look.

PET – PET is a plastic that is resistant to fats and oils, provides an oxygen barrier that maintains the freshness of foods, and offers the highest level of clarity.

Polypropylene – Polypropylene plastic is translucent and offers excellent contact clarity. It is also fat-resistant and can be used under heat lamps.

Polystyrene – This is a lightweight and flexible plastic, available in translucent or white.

Paper – Paper is available vented (for the release of steam) or non-vented for cold applications.

SIZE

Be sure to pick lids made for the containers you're using. Some of our lids fit more than one kind of container, so you can reduce inventory and save money. No matter which lid you choose, you can always count on our secure lid fit.

FUNCTIONALITY

How will you be using your lids? Though we offer numerous variations, there are basically five categories to choose from depending on application.

Flat Plastic Lids – These are your standard, everyday lids. They're good for transport and portion control.

Recessed Plastic Lids – The bottom of the lid fits below the rim of the container to provide an even tighter lid fit and better storage stackability.

Dome Plastic Lids – When serving sundaes, smoothies, or any item that might go over the rim, dome lids are a great choice. There's no better way to merchandise your signature items. Some sizes available in flat top dome for stacking multiple frozen treats.

Non-Vented Paper Lids – Our sturdy paper lids are skirted to provide outstanding lid fit. Exactly what you need for secure transport.

Vented Paper Lids – Specially cut holes allow steam to escape without permitting leakage. These lids also feature a grease-resistant inner disk.

Flat Plastic Lid

Recessed Plastic Lid

Dome Plastic Lid

Non-Vented Paper Lid

Vented Paper Lid

NOTE: Reference product pages/charts for appropriate container & lid combinations.

Ultra Clear™ Soufflé Portion Cups & Lids

Showcase anything from your signature fruit cup to your special shrimp cocktail sauce. The clarity, superb lid fit and increased strength of our clear plastic soufflé portion cups add an upscale accent to all of your offerings.

MicroGourmet™ Deli Food Containers & Lids

Busy operations will appreciate how this versatile line of deli containers allows pre-packaged foods to be refrigerated and microwave-reheated in the same container. Five different container sizes use one common recessed lid to help streamline inventory. Available in contact clear for excellent food visibility or in white to minimize ultra-violet light exposure to keep container contents fresh and extend shelf life. Custom print available on containers only.

Creative Carryouts® Monster Box™ Hinged Rectangular Packages (Hot)

Busy lifestyles make it difficult to find time for food preparation at home. Take out meals have become an essential part of the consumer's daily routine and large families or special events are no exception. The hinged Monster Box™ with easy to close, bar-lock snap lids prevent slippage when stacked. Venting and secure closure preserves just-prepared quality. Fog-resistant lids enhance hot food appeal and package design allows re-heating of many foods in the microwave.

Material	Polystyrene Micro
Container Sizes	112 oz (3312 ml)
Container Color/Design Options	Black
Hinged Lid Color/Functionality Options	Hinged Clear, Anti-Fog, Vented, EZ Close, Bar Locks (Available in 2 and 3-Compartment as MTO) (Embossed Lids also available)
Microwaveable	Yes

VS Double Sided Poly Paper Food Containers & Lids

Our most popular food container line, VS Double Sided Poly food containers are a customer favorite! The squat profile and wide mouth make this product easy for operators to fill and easy for customers to eat! These containers are ideal for cold foods due to the poly coating on the outside of the container which reduces condensation, but can also be used for hot foods due to the temperature maximum of 205 °F. A high gloss finish ensures a smudge-free surface for your stock or custom print to stand out!

VS Single Sided Poly Paper Food Containers & Lids

A unique offering in our food container line up, VS Single Sided Poly food containers are perfect for holding hot foods due to the poly coating on the inside of the container which acts as a moisture barrier to prevent leaking and the matte finish on the outside of the container which conducts less heat on your fingertips. These versatile containers can also be used for cold foods with immediate consumption. The squat profile and wide mouth make this product easy for operators to fill and easy for customers to eat!

Bare® Eco-Forward® VS SSPLA Paper Food Containers & Lids

Bare® Eco-Forward® VS Single Sided PLA lined foot containers are perfect for holding hot foods (with a maximum temperature of 205 °F) due to the PLA coating on the inside of the container which acts as a moisture barrier to prevent leaking and the matte finish on the outside of the container which conducts less heat on your fingertips. These versatile containers can also be used for cold food with immediate consumption. The squat profile and wide mouth make this product easy for operators to fill and easy for customers to eat.

- Compostable in a Commercial Compost Facility – Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting
- Sustainable Alternative – Made from 100% plant-based renewable resources and made with either SFI or FSC certified paperboard
- Third Party Certifications – Meets the ASTM D6868 standard and certified by the Biodegradable Products Institute (BPI) as compostable in a commercial composting facility. Cedar Grove, Inc. facilities accepted

Waxed Double Wrapped Paper Buckets & Lids

A convenient disposable twist on the classic hotel ice bucket. These are a favorite with hotel chains because they're less expensive than cleaning and replacing permanent buckets.

Cutlery

Like many things in your operation, your choice of single-use products is a reflection of the care you show for your customers. So whether you're serving a side of coleslaw in a soufflé portion cup or prime steaks to go, you need quality cutlery that says, "come back soon."

At Solo®, we believe understanding your options is key. Use this as a guide to selecting the right products for your operation from our comprehensive, industry-leading portfolio of single-use cutlery. You'll want to consider material, weight, length, color, kit options and packaging style.

MATERIAL

Single-use cutlery for the foodservice industry is produced with two principal types of plastic.

Polystyrene

At the top end of the category, polystyrene is more rigid and tends to be used in high performance situations, such as upscale takeout or adult casual dining where "knife-and-fork" entrees are served.

Polypropylene

Typically offered in smaller sizes, polypropylene is economical, lighter in weight and somewhat flexible. It's great for quick service applications and anytime you're serving food to children.

WEIGHT

Our cutlery is available in a variety of weights to match any application.

Extra Heavy – Extremely durable, full length and capable of handling even dense foods like steak, extra heavy weight plastic is your best alternative to reusable flatware. With a rigid, solid feel in your hand, expect premium performance for high-end applications. Available in polystyrene.

Heavy – Also appropriate for high-end applications, our full length, heavy weight cutlery pieces provide performance you can count on. They outshine typical heavy weight cutlery because they are thicker, more durable and have improved cutting capabilities for entrees like chicken. Available in polystyrene.

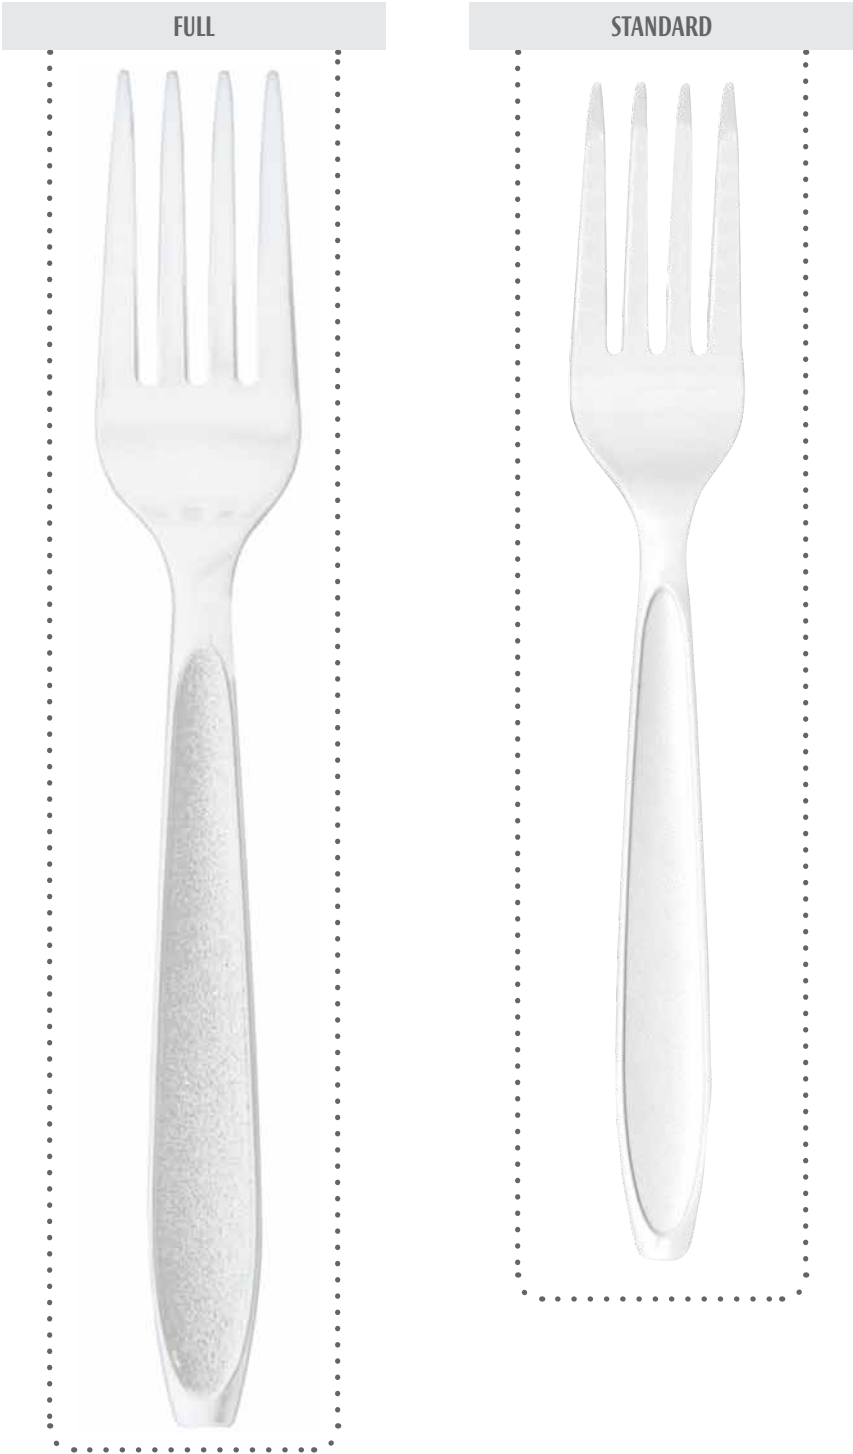

Medium – A solid choice for most everyday entrees, and popular for grab-n-go and takeout, consider it your multi-purpose weight. Medium weight cutlery is a good combination of value and functionality. Available in polystyrene and polypropylene.

LENGTH

Finding the right length is always an important consideration. We offer lengths to match every application.

Full – Tailored to upscale/adult fare, takeout and catering (average length is 7 in/17.8 cm).

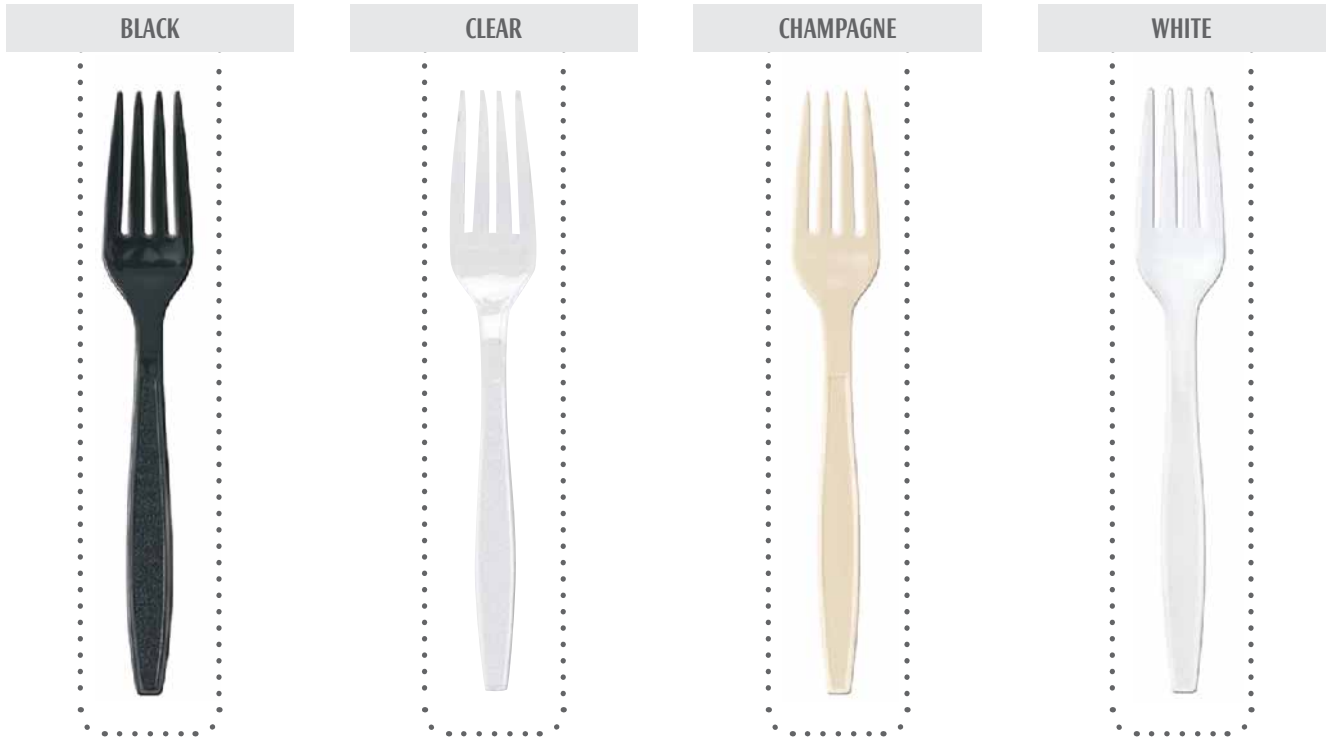

Standard – Can be used for almost anything, which may help simplify your inventory (average length is 6 in/15.2 cm).

(Actual sizes shown.)

COLOR

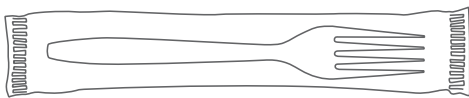

Presentation speaks volumes. Choose cutlery that will complement your tablesetting or takeout packaging color schemes.

KIT CONFIGURATION

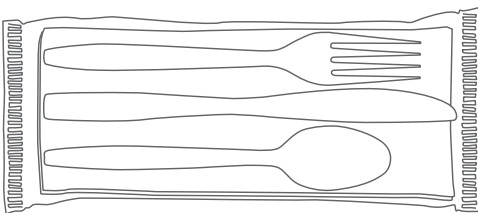

Wrapped or rolled kits can deliver sanitation and convenience. Should a kit interest you, our cutlery is available in a variety of configurations, ensuring there's something suited to every operation and application.

INDIVIDUALLY WRAPPED

No-fuss handling, ultra-sanitary, customer favorite.

WRAPPED KITS

Ultra-sanitary; choose from a range of kit components including cutlery, napkins and condiments.

ROLLED KITS

Ultimate in convenience for high-end dining applications.

PACK CONFIGURATION

How cutlery is packaged can make a big difference to your operation. Choose what suits you best.

Bulk – Your cutlery pieces will arrive loose in a plastic bag and packed in a carton.

Semi-Oriented Bulk – More organized than bulk packaging, but loosely oriented.

Oriented Bulk – Similar to regular bulk packaging, but with pieces arranged for more efficient cube packing.

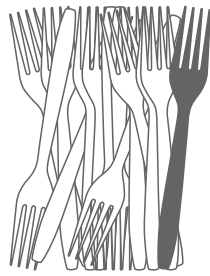

Boxed Case – The most organized and convenient option is a boxed case. Each case contains 10 boxes, each box contains 100 arranged pieces, and individual boxes can be stored throughout the operation.

BULK

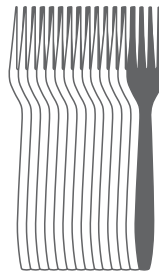

Packed in carton.

SEMI-ORIENTED BULK

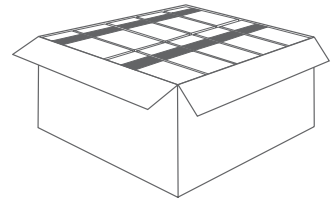

Loosely-oriented stack configurations in carton.

ORIENTED BULK

Easy-to-handle stack configurations in carton.

BOXED CASE

Cases of 10 boxes with 100 easy-to-handle pieces per box.

SPECIALTY ITEMS

For decadent floats, ice cream sampling or simplifying your cutlery offering, we have specialty spoons that make food fun.

SODA SPOON

TASTER SPOON

SPORK

Guildware® Extra Heavy Weight Cutlery

With a premier look and feel, these pieces fit upscale concepts perfectly. You'll find that our finest cutlery delivers the durability to handle even denser foods like steak.

Perfect Pak®

.....

Up to 70% less than Solo's standard case count, Perfect Pak® by Solo is ideal for limited storage space and lower-volume turnover of single-use products. Solo presents a wide selection of product solutions to meet operators' specific needs.

Operator/End-User Challenges	Perfect Pak® Solutions	Office Channel	Cash & Carry	Small Business
Limited storage space	Perfect Pak® cases are designed to be under 21" in height in order to fit in small areas/cabinets in breakrooms and on a retail shelf	X	X	X
Breaking cases often necessary for operators to sell smaller quantities	Perfect Pak® reduced case counts eliminate the need for operators to break cases and allow operators to "turn and earn"	X	X	
End users cannot meet distributor minimums as they use less volume in single-use products	Perfect Pak® case counts are up to 50-70% less than standard case counts and are available for purchase in channels such as office and cash and carry where there are no minimum-purchase requirements	X	X	X
Need retail-ready packaging	Most Perfect Pak® cases have attractive, four-color outer-case graphics that are eye-catching on the shelf	X		
Need for convenient grab-n-go, single-use products	Perfect Pak® Combo Packs includes a smaller quantity of cups and lids in one shrink-wrapped retail-ready package	X		X
Reduce cost per case of inventory	Perfect Pak® has a lower price point per case than a standard foodservice pack size	X	X	X

BEVERAGE PRODUCT OFFERING

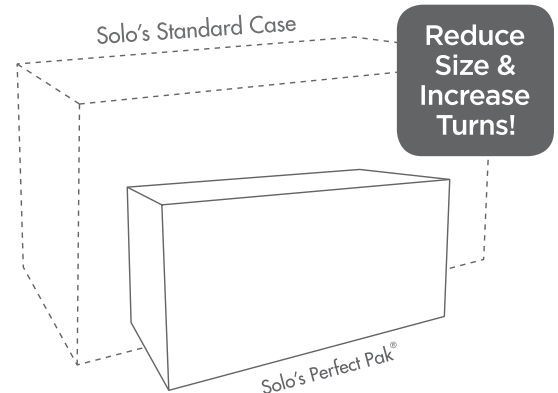

Solo's hot cup offering features single-sided poly paper, insulated and Eco-Forward® options deliver durability and performance in a convenient pack size for operators with space challenges. All Solo hot cups are well engineered with strong sidewalls and smooth, rolled rims for comfort, safety and optimal lid fit.

SINGLE SIDED POLY (SSP) PAPER HOT CUPS

- Polyethylene lining provides a barrier to liquid penetration
- Available in popular Bistro® design

BARE® ECO-FORWARD® SINGLE SIDED PLA (SSPLA) HOT CUPS

- Compostable in a commercial compost facility. Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting
- Certified compostable by the Biodegradable Products Institute (BPI)
- Made from plant-based renewable resources
- Plant-based lining made with Ingeo™ biopolymer

TRAVELER® LIDS – Use with SSP or SSPLA Paper Hot Cups

- Leading-edge design provides optimal fit on Solo paper hot cups
- Inner ring ensures better, tighter fit to reduce dribble, leakage and pop-offs

TROPHY® DUAL TEMPERATURE INSULATED CUPS

- Versatile two-cups-in-one are ideal for hot or cold beverages
- Provides superior insulation over paper
- Rolled rim offers a secure lid fit

INSULATED HOT CUP & LID COMBO PACKS

Comes with cups and lids in one attractive retail pack!

- Trophy® Dual Temperature Insulated Cups with The Gourmet Lid® – an upscale option providing superior insulation and lid fit for hot beverages
- Duo Shield® Insulated Hot Cups with Traveler® Lid – premium paper solution that provides air-pocket insulation to help keep drinks hot longer

GALAXY® POLYSTYRENE COLD CUPS

- Ideal option for cold beverages
- Double sidewall ridges provide strength and durability to help prevent spills

MEAL SERVICE PRODUCT OFFERING

Bare® Eco-Forward® products make it easy to provide environmentally responsible dinnerware. Convenient pack size for catered meals.

BARE® ECO-FORWARD® PAPER DINNERWARE

- Compostable in a commercial compost facility. Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting
- Made from plant-based renewable resources
- Sturdy, strong and soak-through resistant for moderately heavy meals

TAKEOUT PRODUCT OFFERING

Creative Carryouts® hinged and two-piece Expressions® packages are designed for hot or cold meals, side dishes and salads to ensure food remains in place during handling and transport. This versatile packaging line features a variety of features, including some with bases that can be microwaved and anti-fog lids.

CREATIVE CARRYOUTS® OCTAVIEW® HINGED OCTAGON CARRYOUT PACKAGES

- Keeps operation running efficiently with leak-resistant, attached lid
- Visual attraction turns into customer satisfaction driving impulse sales

EXPRESSIONS® TWO-PIECE SQUARE CARRYOUT PACKAGES

- Ideal for display, casual dine-in or to-go applications in a high quality,
 - straight to the table design
- Bases and lids are sold separately

Single Sided Poly Paper Hot Cups & Lids

Solo's single-sided poly paper hot cups deliver durability and performance in a convenient pack size for operators with space challenges. All Solo hot cups are well engineered with strong sidewalls and smooth, rolled rims for comfort, safety and optimal lid fit.

Bare® Eco-Forward® Single Sided PLA (SSPLA) Hot Cups & Lids

For some food packaging applications, a commercially compostable product is the most environmentally responsible option. Our PLA lined hot cup is fully compostable in a commercial compost facility, where it is designed to quickly disintegrate and fully biodegrade.

Bare®

- Made from plant-based renewable resources
- Compostable in a commercial compost facility. Appropriate commercial composting facilities may not exist in your community. Please check with your local municipality. Not suitable for backyard composting
- Meets ASTM D6868 standard for compostability and approved by the Biodegradable Products Institute (BPI)
- Plant-based lining made with Ingeo™ biopolymer
